## Calculating Sugar Limits for Yogurt in the Child and Adult Care Food Program

All yogurts served in the Child and Adult Care Food Program (CACFP) must not have more than $\mathbf{2 3}$ grams of sugar per 6 ounces.
Here are two ways to tell if a yogurt meets the sugar limit.
Option 1*: Check out USDA's chart that shows common serving sizes of yogurt and the maximum amount of sugars they can contain. Find the chart in "Choose Yogurts That Are Lower in Sugar" at https://www.fns.usda.gov/cacfp-training-tools.

Option 2: Use the information on the yogurt's Nutrition Facts label, and follow the steps below:
Find the Serving Size, in ounces (oz) or grams (g).
Write the number of ounces (oz) here:
If weight in ounces is not available, write number of
grams (g) here:-
If the serving size is "one container," check the front of the package to
find out how many ounces or grams are in the container.

2
Find the Total Sugars on the Nutrition Facts label. Write the number of grams (g) of total sugars here: $\qquad$

3
Divide the grams of Total Sugars by the Serving Size. ___ grams Total Sugars - $\qquad$ Serving Size $=$

## Test Yourself:

> Compare the answer in Step 3 with the numbers below. The yogurt meets the sugar limit for yogurt in the CACFP if: a. For ounces of yogurt, the answer is $\mathbf{3 . 8 3}$ or less. b. For grams of yogurt, the answer is $\mathbf{\mathbf { 1 3 5 }}$ or less.
*Due to rounding, you may get a slightly different result when using the charts in Option 1 and doing the full calculation in Option 2. If either of these methods indicates that the yogurt is within the sugar limit, then the yogurt may credit towards a reimbursable meal.

| Nutrition Facts |  |
| :---: | :---: |
| 4 servings per container |  |
| Serving size 8 oz cup |  |
| Amount per serving Calories |  |
|  | Value* |
| Total Fat 2 g | 3\% |
| Saturated Fat 1.5 g | 8\% |
| Trans Fat Og |  |
